

CONVERSATIONAL COMMERCE • POWERED BY MONNIFY

Every chat is a checkout.

An AI sales assistant that answers your customers, takes the payment, and confirms the order – right inside the conversation, day and night.

Payment confirmed

¥42,500 • auto-verified

Order ready to fulfil

while you were offline

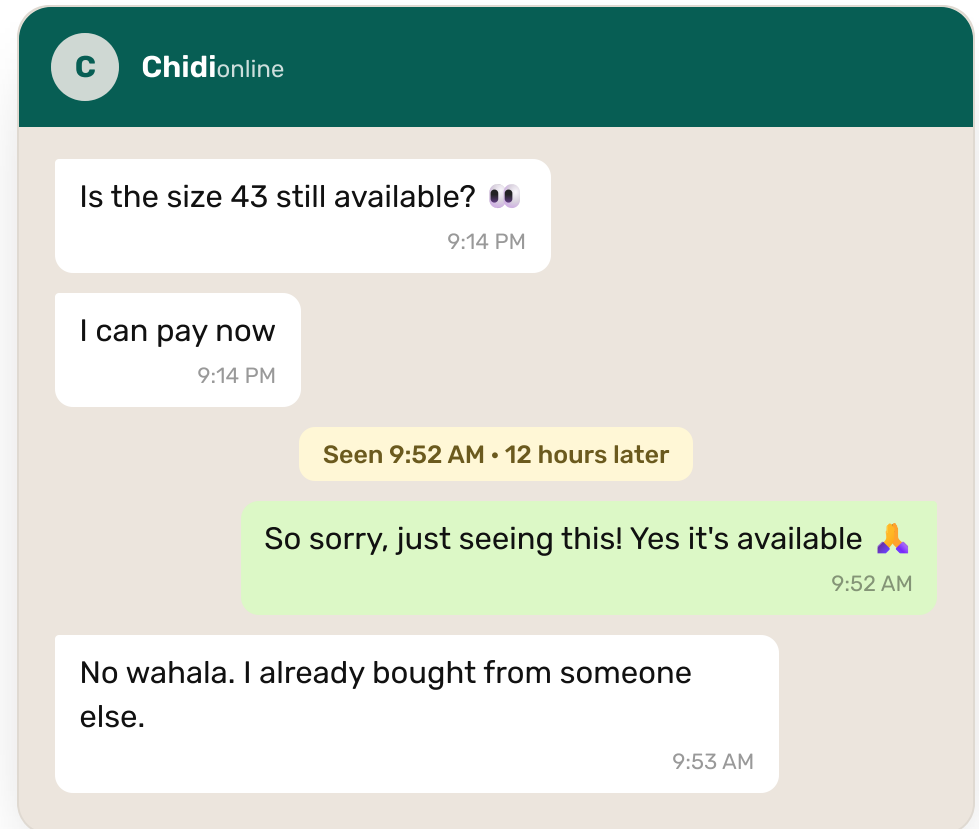

MONNIFY HACKATHON
2026

— THE PROBLEM

Meet Tola. She sells sneakers on Instagram.

A customer messaged her at 9:14 PM, ready to buy. She was asleep. By morning, the sale had walked to whoever replied first.

Tola didn't lose the sale on price or product.
She lost it on **reply time**.

Sellers are human. Buyers won't wait.

Replies come late

Sleeping, driving, in church, or serving the customer in front of them — the message sits unread.

Payment is a manual chase

"Have you sent it?" • screenshots • refreshing bank alerts • matching names to amounts by hand.

Every delay is an exit

Intent is highest the second a customer asks. Minutes later, it's gone to a faster seller.

~30%

of ready-to-buy customers abandon the purchase when the reply takes too long.

WIDELY-CITED RESPONSE-TIME ESTIMATE

Hours / week

lost to answering the same questions and reconciling payments by hand — instead of selling.

TIME THAT DOESN'T SCALE

ZPay replies, collects the payment, and confirms the order — **while you're away.**

Customer messages

"I want 2 hoodies." Plain text, on the channel they already use.

AI answers instantly

Confirms items and price, then sends a real account or checkout link.

Payment auto-verified

Monnify webhooks confirm the money landed. No screenshots, no guessing.

You're notified

One alert: order paid and ready to fulfil. That's the only time you step in.

— HOW IT WORKS

 **ZPay Assistant** online • replies instantly

I want 2 White Sneakers and a Black Hoodie

3:02 PM

Got it — 2× White Sneakers, 1× Black Hoodie.
Total **₦42,500**. Transfer to the account
below and I'll confirm automatically 📲

WEMA BANK • RESERVED ACCOUNT

7822 019 455

3:02 PM

Customer transfers ₦42,500

✓ **Payment received — order confirmed.**
A receipt is on the way, and the seller has
been notified.

3:03 PM

Plain text in. Paid order out.

Reads the order like a person

Handles quantities, typos, and slang — no forms, no menus, no keywords to memorise.

Real Monnify payment rails

Generates a reserved bank account or a checkout link on the spot — not a mock.

Confirmed without you

The webhook settles the payment, the order flips to paid, and a receipt goes out.

No app to download. No browser tab. The checkout **is the chat.**

Five moving parts. One clean handoff.

Each piece does one job and passes the order to the next — the customer only ever sees the chat.

STEP 1

The chat

WhatsApp today; Instagram & Messenger next. Where customers already are.

STEP 2

The AI reader

Turns "2 hoodies" into a priced, itemised order it can act on.

STEP 3

The ZPay engine

Runs the conversation and the rules — what's in stock, what's owed, what's next.

STEP 4

Monnify

Creates the account, moves the money, and confirms the moment it lands.

STEP 5

Your console

Every paid order, in one place — no bank-alert hunting required.

Built on **Bun + TypeScript**, **Firestore**, and **Monnify** — with a decoupled WhatsApp listener so the chat never blocks the payment.

A hackathon build that behaves like production.

Every item on the Monnify production checklist – security, correctness, operations – is checked.

Signed webhooks

Every callback is verified with `HMAC-SHA512` against the raw body before anything is trusted.

No double-charges

Idempotency keys bind every transaction, so repeats are ignored, not re-run.

Payment reconciliation

Over- and under-payments are caught automatically, with refunds triggered on excess.

Nightly reconciliation

A scheduled job compares our ledger to Monnify's records and flags any drift.

Secrets stay secret

Keys load from environment variables only – nothing sensitive is ever committed.

Health you can ping

A public `/health` endpoint reports live Monnify connectivity for judges to check.

Nigeria sells in the DMs.

Chat is the storefront

Millions of small sellers run their whole business through WhatsApp and Instagram DMs.

Social commerce is growing

More buying moves into conversations every year — and none of it wants a checkout page.

Why now

AI is finally good enough to run the conversation, and Monnify provides the rails to settle it.

40M+

Nigerian MSMEs

the total market that sells and supports over chat

Millions

Social-first sellers

already taking orders in WhatsApp & Instagram DMs

Beachhead

High-volume chat sellers

fashion, food, and beauty merchants we start with

Figures are directional market estimates, sized top-down — not audited counts.

Simple to start. **We earn when you sell.**

STARTER

Free

For the seller trying it on one channel.

- ✓ 1 WhatsApp number
- ✓ Up to 50 confirmed orders / mo
- ✓ Monnify transaction fees only

GROWTH

MOST POPULAR

₦9,500/mo

For the seller doing real volume.

- ✓ Everything in Starter, unlimited orders
- ✓ + ₦40 per confirmed order
- ✓ Product catalog & sales analytics
- ✓ Auto refunds & reconciliation

BUSINESS

Custom

For teams and multi-channel brands.

- ✓ WhatsApp, Instagram & Messenger
- ✓ Multiple agents & numbers
- ✓ Priority support & onboarding

Conversation, payment, and reconciliation – in one place.

APPROACH	REPLIES 24/7	TAKES PAYMENT	ZPAY
Replying in DMs by hand	✗ Only when awake	Manual chase	✓ Automatic
Generic chatbot	✓ Yes	✗ Talks, can't collect	✓ Built in
Sending a payment link	✗ No conversation	✓ Yes	✓ Verified & reconciled

Others do one part. ZPay runs the whole sale – from the first question to a settled, reconciled order – on Monnify's rails.

Built at this hackathon. Working today.

SHIPPED

- ✓ Chat → payment → confirmation, end to end
- ✓ WhatsApp pairing — QR code or pairing code
- ✓ Monnify reserved accounts + checkout links
- ✓ Merchant console with live orders
- ✓ Automated reconciliation & refunds

NEXT

- + Instagram & Messenger channels
- + Sales analytics & buyer insights
- + Multi-agent shared inbox for teams
- + One-tap catalog import

z ZPay

Turn every conversation into a **customer.**

Conversational payments for the way Africa actually sells —
powered by Monnify.

Start selling 24/7

See it live

THANK YOU, JUDGES 🙏
